

NEW & IMPROVED PERSON-TO-PERSON PAYMENTS VIA TEXT OR E-MAIL

**NO WALLET?
NO PROBLEM!**

popmoney
Formerly ZashPay

Do you need to reimburse a friend for lunch or send money to the kids away at college? Forget writing a check, finding a stamp, heading to the mailbox and waiting several days for the check to clear.

Now it's as easy as sending a text message or e-mail with Popmoney from Quantum National Bank. The money goes directly from your account to the recipient's, usually within 1-2 business days, no matter where they bank!

It's simple to send money with Popmoney!

1. Access Popmoney through your Quantum on-line banking. (If you haven't registered for on-line banking, you must do that before you can use Popmoney.)
2. Once you're logged in, look for the "Popmoney" tab and click to begin.
3. Enter the recipient's e-mail address or cell phone number and the amount you want to send. (There is an area where you can enter the recipient's bank information but that's not required.) You may choose to include a note or even an e-greeting card.
4. You will be notified when the transaction is complete.
5. If the recipient's financial institution is part of the Popmoney network, they can complete the transaction from their own bank's on-line banking site. If not, they can go to www.popmoney.com (this is a secure site) to complete the transaction.

Receiving money through Popmoney is just as simple!

1. You'll receive an e-mail or text message letting you know you have money waiting for you.
2. Log-in to your Quantum account and complete the deposit.
3. If the person sending you the money has your specific account information, the money will be automatically deposited into that account.
